

Transurethral Incision or Resection of the Prostate Consent Form

Surname	
First name	
NHS/hospital no.	
Date of birth	____/____/____

<b>Special communication requirements</b> (e.g. need for interpreter, visually impaired)	
<b>Proposed procedure or course of treatment:</b> (include brief explanation if medical term not clear)	Transurethral Incision or Resection of the Prostate This operation involves the telescopic removal of obstructing parts of the prostate with a heat diathermy or laser. Temporary insertion of a catheter for bladder irrigation
<b>Other procedures/treatment which may become necessary during the procedure:</b>	To deal with complications if they occur
<b>Anaesthetic:</b> <input type="checkbox"/> General <input type="checkbox"/> Spinal <input type="checkbox"/> Local	<b>Blood transfusion:</b> If bleeding excessive

Statement of health care professional (to be filled in by health care professional with appropriate knowledge of proposed procedure, as specified in Consent Policy)

I have explained the procedure to the patient. In particular, I have explained the following.

Benefits: the intended benefits of this procedure/treatment are:

- Relief of urinary obstruction and improvement in urinary flow

Risks: Common

- Temporary mild burning, bleeding and frequency of urination after procedure
- May not relieve all prostatic symptoms
- No semen is produced during an orgasm in approximately: 20% if incision or 75% if resection

Occasional

- Infection of bladder or kidney requiring antibiotics
- Possible need to repeat treatment later due to reobstruction (approx 10%)
- May need self catheterisation to empty bladder fully if bladder weak
- Poor erections possible (impotence in approx 5- 10%)
- Bleeding requiring return to theatre and/or blood transfusion
- Failure to pass urine after surgery requiring a new catheter

Rare

- Finding unsuspected cancer in the removed tissue and this may need further treatment
- Absorption of irrigating fluids causing confusion, heart failure
- Injury to urethra causing delayed scar formation
- Loss of urinary control (incontinence) temporary or permanent
- Very rarely, perforation of the bladder requiring a temporary urinary catheter or open surgery

Alternatives: I have also discussed what the procedure is likely to involve and any concerns of this patient. I have also discussed having no treatment and the following alternatives:

- Drugs. Use of a catheter or stent. Observation or open operation

Further supporting information - I have provided the following leaflet \_\_\_\_\_

Signature.....Name (PRINT).....Date \_\_\_\_/\_\_\_\_/\_\_\_\_  
Job title.....Contact Details.....

Statement of interpreter (where appropriate)

I have interpreted the information above to the patient, to the best of my ability, and in a way in which I believe they can understand.

Signature.....Name (PRINT).....Date \_\_\_\_/\_\_\_\_/\_\_\_\_

Confirmation of consent by a health professional on admission of the patient, if the patient has signed the form in advance. On behalf of the team treating the patient, I have confirmed with the patient that s/he has no further questions and wishes the procedure to go ahead.

NHS/hospital no.	
Date of birth	____/____/____

Statement Of Patient

Please read this form carefully. If your treatment has been planned in advance, you should already have your own copy, which describes the benefits and risks of the proposed treatment. If not, you will be offered a copy now. If you have any further questions, do ask – we are here to help you. You have the right to change your mind at any time, including after you have signed this form.

- I agree to the procedure or course of treatment described on this form.
- I understand that you cannot give me a guarantee that a particular person will perform the procedure. The person will, however, have appropriate experience.
- I understand that I will have the opportunity to discuss the details of anaesthesia with an anaesthetist before the procedure, unless the urgency of my situation prevents this. (This only applies to patients having general or regional anaesthesia.)
- I understand that any procedure in addition to those described on this form will only be carried out if it is necessary to save my life or to prevent serious harm to my health.
- I agree that any tissue removed and the results of diagnostic tests may be used for teaching, audit and research that could benefit other patients.
- I have been told about additional procedures, which may become necessary during my treatment. I have listed below any procedures, which I do not wish to be carried out without further discussion.
